PERSONAL SUMMARY

AI SDET Engineer (ISTQB Certified) with 4+ years of experience in test automation, LLM/GenAI testing, and AI agent validation. Specialized in Playwright, TypeScript, Selenium, and Appium for web and mobile automation. Proven expertise evaluating large language models with DeepEval, RAGAS, and LangChain — assessing accuracy, relevance, latency, and hallucination control. Experienced in CI/CD pipeline integration (GitHub Actions, Jenkins), REST API testing, and shift-left testing strategies. Delivered 90–95% bug-free releases, reduced post-release defects by 90%, and led QA strategy for products with 7M+ MAU.

EXPERIENCE

PHOT.AI

Gurugram, Haryana

SDET Lead – AI & Automation

June 2024 to Present

- Built an MCP-based Playwright framework integrated with AI agents for autonomous web and API test orchestration, cutting Manual regression time by 60% with zero human intervention.
- Evaluated LLM chatbots and AI agents using DeepEval And RAGAS, measuring accuracy, latency, hallucination rate, and RAG pipeline quality.
- Managed QA for Generative AI photo editing and visual content creation platform, reducing post-release defects by 90%.
- Integrated automation into CI/CD pipelines (GitHub Actions) with shift-left testing and test observability.
- Validated backend services and database operations, contributing to an 80% improvement in API performance.
- Debugged AWS cloud performance issues via log analysis, resolving bottlenecks that reduced average response latency by 30%.
- Led and mentored an 8-member QA team across test planning, task allocation, and quality gates.

APPYHIGH TECHNOLOGY LLP

Gurugram, Haryana

Senior Software QA Engineer

April 2022 to May 2024

- Led QA for B2C app launches, driving 5M+ downloads and 4.5+ Play Store ratings.
- Managed QA across 20+ products supporting 1M+ DAU and 7M+ MAU at scale.
- Boosted API defect detection by 25% via Postman & REST API automation; improved release stability by 10%.
- Executed functional, regression & E2E testing, cutting production bugs by 20% with 100% traceability via JIRA.
- Tested GenAI app event tracking via Mixpanel, CleverTap, and GA, ensuring accurate analytics validation..
- Leveraged GenAI tools for test scenario generation, creating 800+ mobile test cases across functional, edge-case, and regression flows, improving test coverage from 40% to 90%.
- Awarded Employee of the Year (2022–23) at AppyHigh Technology.

SKILLS

- Test Design:** Test Scenarios, Root Cause Analysis.
- API & Backend Testing:** Postman, REST API Testing, API Automation, Backend Validation, Charles Proxy
- Mobile Testing:** Android, iOS, Firebase Crashlytics.
- AI / LLM Testing:** DeepEval, RAGAS, LangChain, Ollama, Prompt Engineering, Hallucination Testing, RAG Testing, AI Agent Testing
- Automation Framework Design:** POM, Hybrid Framework, Data-Driven Framework, SOLID Principles.
- AI Engineering Tools:** Claude Code, GitHub Copilot, Codex, Gemini.
- Performance Testing:** JMeter.
- QA Methodology:** Test Planning, Test Strategy, Regression Testing, Agile/Scrum, SDLC/STLC
- CI/CD & DevOps:** GitHub Actions, Jenkins, AWS, Shift-left Testing, Test Observability
- Defect Management:** Jira.
- Test Automation:** Playwright, Selenium, Appium,
- Programming:** TypeScript, JavaScript, Node.js.
- Databases:** MySQL, MongoDB.

EDUCATION

Integral University

Lucknow, India

Master of Computer Applications

2019 – 2021

- Percentage: 83%

University of Prayagraj

Prayagraj, India

Bachelor of Computer Applications

2015 – 2018

- Percentage: 78%

KEY PROJECTS

AngleLab — AI-Powered Marketing Intelligence & Creative Generation Platform | Playwright | TypeScript | LLM Testing | DeepEval

- Verified AI-driven ad strategy workflows covering product ingestion, ICP identification, marketing angle and hook generation, reference creatives, and final ad creative generation.
- Evaluated LLM and AI-generated outputs using DeepEval metrics for faithfulness, relevancy, contextual alignment, brand consistency, and prompt adherence.
- Automated critical user journeys using Playwright with TypeScript, covering UI functionality, end-to-end workflows, and regression scenarios.

VideoLab — AI-Powered Video Generation & Creative Automation Platform | Playwright | Postman | E2E Testing | JIRA | AI Assisted Testing

- Spearheaded end-to-end testing of AI video generation workflows, covering storyboard creation, scene sequencing, motion effects, transitions, audio synchronization, and final video rendering.
- Assessed generated videos across multiple aspect ratios, resolutions, and export formats, focusing on frame quality, playback behavior, media synchronization, and output consistency.
- Executed integration, regression, failure-recovery, and production release testing while managing defects end-to-end in JIRA, from identification through verification and closure.

ListingLab — AI-Powered Marketplace Listing Optimization Platform | Postman | REST API Testing | MongoDB | Database Testing

- Owned backend-focused testing of AI listing generation workflows, covering product data ingestion, marketplace URL processing, competitor analysis, keyword extraction, and listing content generation.
- Conducted comprehensive REST API and MongoDB testing to ensure request/response accuracy, data persistence, field mappings, database correctness, and end-to-end data integrity.
- Ensured marketplace-specific listing quality by testing AI-generated product content for accuracy, SEO relevance, and platform requirements, while validating end-to-end payment workflows, including subscription purchases, renewals, upgrades, and payment failure scenarios.

CERTIFICATIONS

- ISTQB Certified Tester – Foundation Level (CTFL)
- IBM Data Science Professional Certificate
- Google IT Automation with Python
- Agile with Atlassian Jira
- Test AI & LLM App with DeepEval, RAGAs & more using Ollama
- Build Agentic AI & Multi-Agent System for Software Testing.
